MORNSUN[®]

SMD Single high-speed RS485 isolated transceiver module (enhanced)

FEATURES

- Small size, SMD package
- Integrated high efficiency isolated DC/DC converter
- Two-port isolation (3.0kVDC)
- Operating temperature range: -40°C to +85°C
- High baud rate up to 500kbps
- The bus is able to support 256 nodes at maximum
- Set isolation and ESD bus protection in one
- EN60950 approval

TD321S485H-E / TD521S485H-E, the main function is to convert the logic level to the RS485 protocol differential level, to achieve signal isolation; is a IC integrated technology to achieve the power isolation, signal isolation, RS485 communication and bus protection in the One of the RS485 protocol transceiver module. The product comes with constant pressure isolation power supply, can achieve 3000VDC electrical isolation. Products using SMD packaging technology, enabling customers to easily automated processing. Products can be easily embedded in the user equipment, so that equipment can easily achieve RS485 protocol network connection.

Selection Guide								
Certification	Part No.	Mark	Power input (VDC)	Baud rate (bps)	Static Current (mA)	Max. Operating Current (mA)	lsolation power output (typ.)(VDC)	Number of Nodes
05	TD321S485H-E	321SRHE	3.15-3.45	500k	40	130	5	256
CE	TD521S485H-E	521SRHE	4.75-5.25	500k	42	130	5	256

Limit Specifications						
Item	Operating Conditions	Min.	Typ.	Max.	Unit	
Input Surge Voltage (Jaco may)	3.3V series	-0.7		5		
Input Surge Voltage (1sec.max.)	5.0V series	-0.7		7	VDC	
Pin Welding Resistance Temperature	Welding time: 10s (Max.)			300	°C	
Reflow Soldering Temperature		Peak temp.≪245°C, maximum duration time≪60s at 217°C. For actual application, please refer to IPC/JEDEC J-STD-020D.1.				

Input Specif	ications(3.3	V series)					
ltem		Symbol	Min.	Тур.	Max.	Unit	
Power Supply Inp	ut Voltage	VCC	3.15	3.3	3.45		
TVD Logic Lovel	High-level	Vih	0.7Vcc	3.3	3.6	VDC	
TXD Logic Level	Low-level	Vil	0		0.8		
	High-level	Voh	Vcc-0.4	3.1			
RXD Logic Level	Low-level	Vol	0	0.2	0.4		
TXD Drive Current		Г	2				
CON Drive Current					5	mA	
RXD Output Current		lR			2		
Serial Interface		Compatible with + 3.3 V UART interface	Compatible with + 3.3 V UART interface only				

Input Specif	fications(5.0	V series)					
ltem		Symbol	Min.	Тур.	Max.	Unit	
Power Supply Inp	ut Voltage	VCC	4.75	5	5.25		
TVD Lagia Laval	High-level	ViH	0.7Vcc	5	5.5		
TXD Logic Level	Low-level	Vil	0		0.8	VDC	
	High-level	Voh	Vcc-0.4	4.8			
RXD Logic Level	Low-level	Vol	0	0.2	0.4		
TXD Drive Current		л	2				
CON Drive Current		ICON			5	mA	
RXD Output Current		lR			2		
Serial Interface		Compatible with + 5 V UART interface only

Industrial Bus TD5(3)21S485H-E Series

MORNSUN®

Application Precautions

- 1. Please read the instructions carefully before use; contact our technical support if you have any problem;
- 2. Do not use the product in hazardous areas;
- 3. Use DC power supply for the product and 220V AC power supply is prohibited;
- 4. Do not dismount and assemble the product without permission to avoid failure or malfunction of equipment;

After-sales service

- 1. Ex-factory inspection and quality control have been strictly conducted for the product; if there occurs abnormal operation or possibility of failure of internal module, please contact the local representative or our technical support;
- 2. The warranty period for the product is 3 years as calculated from the date of delivery. If any quality problem occurs under normal use within the warranty period, the product can be repaired or changed for free.

Applied circuit

Refer to the RS485 Industrial Bus Interface Isolating Module Application Manual.

Design Reference

1. Typical application circuit

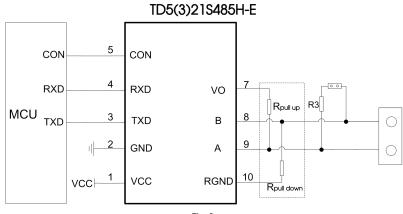

Fig. 1

As shown in Figure 1, TD5 (3) 21S485H-E isolated transceiver module typical connection circuit, which TD521S485H-E module must use 5V power supply, the module TXD, RXD and CON pin interface matching level of 5V, does not support 3.3V system level, TD321S485H-E module must use 3.3V power supply, the module TXD, RXD and CON pin interface matching level of 3.3V, does not support 5V system level. R pull-up, R pull-down for the external reserve pull-down resistor, according to the actual situation to choose whether the need for external pull-down resistor. TD5(3)21S485H-E lsolated transceiver module has built-in 120k^Ω pull-down resistor, under normal circumstances the use of internal pull-up, pull-down resistor to meet the demand.

2. Recommended port protection circuit

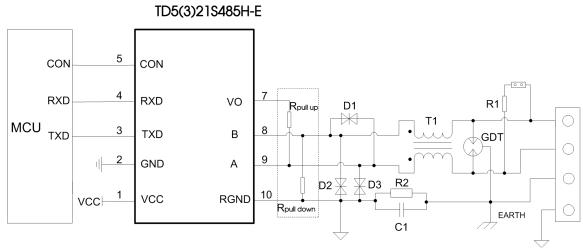

Fig.2

Notes:Twisted pair shield grounded reliably.

MORNSUN GUANGZHOU SCIENCE & TECHNOLOGY CO.,LTD

Industrial Bus TD5(3)21S485H-E Series

Parameter declaration:

Components	Recommended parameters	Components	Recommended parameters
RI	120 Ω	R2	1ΜΩ
C1	102,2kV	DI	SMBJ12CA
TI	ACM2520-301-2P	D2、D3	SMBJ6.5CA
GDT	S30-A90X	Rpull up、 Rpull down	Select the appropriate resistance matching network

As the module internal A / B line comes with ESD protection, so users generally apply to the environment in good circumstances without additional ESD protection devices, as shown in Figure 1, the typical connection circuit. But if the application environment is relatively poor) such as high voltage power, lightning and other environments), it is recommended that users must be in the module A / B line side plus TVS tube, common mode inductors, Gas discharge tube, shielded twisted pair or the same network single point Earth and other protective measures. Therefore, the recommended application circuit shown in Figure 2, the recommended parameters as shown in the table. Recommended circuit diagram and parameter values for reference only, according to the actual situation to determine whether the need for circuit diagram of the device and the appropriate parameter values.

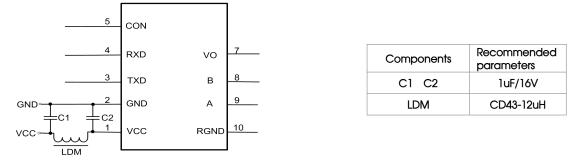

Fig.3

3. Precautions

- 1) Hot swapping is not supported.
- 2) TD521S485H-E is not compatible with 3.3V TTL level; TD321S485H-E is not compatible with 5V TTL level.
- 3) Module 6 feet are not drawn, this pin is left when the pin 10 is not used.
- 4) Data transmission line, please use shielded twisted pair, the same network of shielding the single point of the earth.
- 5) From the truth table characteristics can be seen, The series of embedded isolated RS-485 transceiver module is in the CON pin is low to send data, CON pin is high when receiving data, and the general 485 transceiver chip transceiver control level is the opposite. Therefore, if the customer wants to change with the ordinary 485 transceiver chip transceiver control level is the same, Then recommend the customer in the MCU and CON feet between a transistor reverse circuit.

6) From the truth table characteristics, the series of embedded isolated RS-485 transceiver module when the A / B line differential voltage greater than or equal to -50mV, the module receiving level is high; when the A / B line differential voltage is less than or equal to -200mV, The module receiving level is low; when the A / B line differential voltage is greater than -200mV and less than -50mV, the module receiving level is uncertain, the design to ensure that the module is not receiving the state. So the user in the RS-485 network design or application, according to the actual situation to decide whether to add $120 \,\Omega$ termination resistor. Principle of use: Regardless of whether the RS-485 network is static or dynamic, it is necessary to ensure that the differential voltage of A / B line is not between -200mV and -50mV. Otherwise, the data communication error will occur.

Package diagram:

Notes:

- 1. Packing information please refer to Product Packing Information which can be downloaded from www.mornsun-power.com. Packing bag number: 58240012;
- 2. Unless otherwise specified, data in this datasheet should be tested under the conditions of Ta=25°C, humidity<75% when inputting nominal voltage and outputting rated load;
- 3. PCB surface may be micro-color difference, is a normal phenomenon, does not affect the use of the product;
- 4. All index testing methods in this datasheet are based on our Company's corporate standards;
- 5. The performance indexes of the product models listed in this datasheet are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technician for specific information;
- 6. We can provide product customization service;
- 7. Products are related to laws and regulations: see "Features" and "EMC".
- 8. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units
